## **DETAILED ACTION**

### ***Status of the Claims***

1. This action is in response to the application filed on September 26, 2001. Claims 1-10 are pending.

### ***Claim Objections***

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Currently, claim number is omitted. Misnumbered claims 8-11 have been renumbered 7-10.

3. Claim 1, 8 and 10 are objected to because of the following informalities: the parentheses before the word "First" and after the word "points" should be deleted. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 101***

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-10 disclose an abstract idea because they merely determine, create and calculate certain values and do not produce tangible result. The applicant is

Art Unit: 3694

advised to amend the independent claims that include the step of output the value(s) to a certain device in order to overcome the rejection.
